DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

Claims 1, 3-7, 9-17 and 19-21 are allowed over the prior art of record including closest European Patent to MA (EP 1085509) and US Patents to Eastman (US 5646919) and Nakamura (US 6167009), because the prior art of record considered individually or in combination fails to disclose or fairly teach a tilt detection device which calculates phase comparison signals as claimed including the step of detecting a radial tilt by reading a level value of one phase comparison signal when the other phase comparison signal is zero, wherein the zeroing of the level value of the phase comparison signal occurs when the laser beam crosses a point signifying a 1/2 a track pitch of a track on the disc.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
